A little bit more about us

We stock a wide variety of vinyl, fabric, hardware, tools, and supplies for use in the automotive, marine, and furniture industry. Our foam department operates in a 15,000 square foot building that houses some of the most cutting-edge equipment operated by our expert staff. With our wide range of goods spanning many different industries, we aim to be your one-stop supplier for all of your upholstery, canvas and sewn product needs.

Skip Yant

Ed Scott, Skooter Scott, Skip Yant

Rex Pegg Fabrics was originally founded by Rex V. Pegg in 1962 selling automotive original materials out of a station wagon. In the early 70's Rex hired Donovan Scott as an outside salesman. In 1978, Rex hired Skip Yant as a warehouseman, who worked his way up in the company, eventually becoming a shareholder. In 1980, Rex Sold the business to Don Scott. Don's Son Skooter joined the team in 1981 and his other son Ed in 1996. Today, Rex Pegg Fabrics is still owned and operated as a family business. After 41 years with the company Skip retired at the end of 2019. As of the end of 2024, Ed retired after 33 years with the company. Rex Pegg Fabrics employs over 40 people, 13 of which have over 15 years of experience.

Phoenix Trim & Supply

Phoenix Trim & Supply Company was originally founded by J.B. Rhodes in 1946, servicing the automotive and marine markets in Arizona. Operating as a family-owned business, Phoenix Trim & Supply employs a team with up to 30 years of experience.

After 75 years in the Rhodes family, Phoenix Trim & Supply was purchased by Rex Pegg Fabrics Inc. headquartered in Tacoma, Washington.

Rex Pegg Fabrics and now **Phoenix Trim & Supply** will strive to establish itself as the *"Best in Service"* by making sure we consistently meet your expectations for quality goods, combined with fast and friendly service.

Sampler kit is a great way to set your client up for success with helping maintain their windows.

Item#
OSEA-KIT *

Cleans, shines, and protects automotive, marine or commercial clear flexible windows safely and effectively. With UV protection to enhance flexibility and an anti-static formulation to help repel dirt from the surface, this product can be used daily, removing fingerprints and other contamination to keep clear flexible windows shining like new.

Formulated to safely clean, polish and protect your automotive, marine or commercial clear flexible windows. This polymer product molecularly bonds to the surface creating a nearly invincible protective barrier against the damaging effects of marine environment pollutants.

303® Top Kits

303® Fabric Convertible Top Care Kit is a premium cleaner specially formulated to clean fabric convertible tops as well as Tonneau covers. Designed to accomplish even the toughest cleaning jobs safely, using no harsh chemicals while rinsing residue free.

Nothing sets off an upholstery job better than a straight french seam or topstitch. Combined with thick thread, the job really pops. QTC Contrast T-270 bonded nylon thread is designed for seams that get noticed. Bold colors recommended for decorative seat trimming, accent stitching and more. The bonded nylon thread comes on 8oz. spools, and you can choose from a pallet of 24 colors.

SUNGUARD+
UVR Bonded Polyester

Now More Resistant to Cleaning Chemicals

Protection Against Sun, Chemicals & Seam Leakage

SUNGUARD+ is a UVR bonded polyester thread that goes through a state-of-the-art twisting, bonding and dying process to ensure the highest quality of colorfastness and performance. Added nanotechnology prolongs the life of the thread outdoors and helps meet anti-wick standards. Each production lot is tested to meet or exceed the QTN Quality Assurance standards.

Sunguard+ Features:

- Resistant to Cleaning Chemicals
- Maximum UV Resistance
- Retains 15% More Thread Strength Compared to Other Polyester Threads
- Combats Seam Leakage with Anti-Wick Finish
- Resistant to Mold, Mildew, Chlorine and Bromine
- Meets or Exceeds Quality Assurance Standards (including color transfer and migration testing)
- Available in 37 of the Most Popular Shades of Acrylic Fabric
- Ready-Wound Bobbins Available

SUNGUARD+ BOLD™
UVR BONDED POLYESTER

NEW B207 8oz.

SAME QUALITY AS SUNGUARD+™ IN A BIGGER, BOLDER CONTRAST STITCH

UV RESISTANCE

CHEMICAL RESISTANCE

New Sunguard+ BOLD™ has many features of QTN's Sunguard+™ UVR Bonded Polyester, in a larger size – B207/T210. Size B207/T210 is typically used in heavy-duty sewing applications such as awnings & shade, automotive, marine, outdoor furniture, tarps, covers, and anywhere durable stitching is necessary.

Sunguard+ BOLD™ is a UVR bonded polyester thread that goes through a state-of-the-art twisting, bonding and dying process to ensure the highest quality of colorfastness and performance.

Other benefits:

- Maximum UV resistance
- Chemical resistance
- Mold & mildew resistance
- Retains 15% more strength than other polyester threads
- 12 colors available in 8-ounce spools
- Made in the U.S.A

PERFECT STITCHING... THE 1ST TIME!

TIME IS MONEY.

SPEND YOURS WISELY.

SolarFix® Provides Time & Labor Savings with:

Smooth Sewability
- Consistency of the thread results in smooth sewing experience, less stops

Unique Manufacturing Process
- Holds back tack; improves sewing speed

Interchangeable in Double Needle Sewing
- SolarFix® works in both needles; you only need to stock one thread

Size Differentiation
- Color-coded spools to help differentiate sizing faster

Large Inventory of Multiple Sizes and Colors
- In stock and ready to ship

Rex Pegg Fabrics, Inc

Webbing

Polypropylene Webbing is very versatile webbing. Works well for marine purposes, bags, sporting equipment, and much more.

Nylon Webbing is best product for marine, works well where high strength, combined with a smooth finish, is required.

Halter Webbing has a considerably higher strength than standard nylon webbing.

Polyester Webbing is ideal for most outdoor applications due to it's resistance to mildew growth and UV rays, plus superior strength and abrasion resistance.

Polypropylene Webbing

GEOMETRIC HULL LINER
Geometric hull liner is a mold, mildew, and UV resistant material that can be used for headliners and side walls in boats and RV's. It is 72" wide and available in 6 colors.

HYDROMAT
Hydromat is a superior woven vinyl floorings designed with long wearing performance qualities. Great for both indoor and outdoor spaces. Can be for either glue down or snap in installation. The backing is light weight high-density compact cushion felt, which contributes to the products durability creating stability and crush resistance. Hydromat is 102" wide and is stocked in 6 colors.

LAKESIDE
Lakeside is a 72" wide, 100% solution dyed polyester needle punch marine carpet. Lakeside has a high UV resistance and will not unravel or fray, making it ideal for boat interiors, boat trailer bunks, dash covers, and interior trim. Available in 7 colors.

LUNA
Luna is a hybrid marine flooring constructed of woven UV stabilized PVC & polypropylene yarns to achieve extreme durability for long term performance while protecting against degredation, mold & mildew, and fading. It's low profile pattern and natural stain resistance make it easy to maintain, just hose off and let dry. It's face and backing do not absorb water. Luna's dense urethane foam backing also provides added cushion under foot while keeping the floor looking fresh and new. Luna flooring is designed for both direct glue down for full deck applications and custom fit mat installations. Luna is 102" wide and is stocked in 3 colors.

NIB BACKING
Nib back is a carpet backing used to make floor mats. The backing grips into carpet to help keep it in place. 36" wide and available in black.

SNAP BACKING
Snap Back is a 72" wide backing that when glued to marine carpet creates a lay down application. It is mold and mildew resistant, and has a non slip backing to keep the carpet in place.

SPECTROPILE
Spectropile is great for use on dash covers, boat interiors, boat trailers, bunks, and interior trim. It is made of eco-fi material, which means it is composed of 100% post-consumer recycled plastic bottles and is 72 inches wide. Spectropile has high UV resistance and heat resistance. Additionally, it will not unravel or fray and also resists mold and mildew.

SRO RIGID FELT
SRO rigid felt is a 72" wide hull liner that is UV rated and mildew resistant, making it the best choice for a marine gunnel liner. SRO is available in charcoal only.

Luna Woven Flooring

HydraFelt Features :

* Foam and felt combination for extra cushion and softer feel under foot.

* Outer felt layer provides extra coverage and requires less prep work by covering irregularities in floor decking.

* Superior surface for bonding with marine grade adhesives for consistent installation.

* Can be used for both direct glue and drop-in mat applications.

* Retains its intergrity in drop-in mat applications. does not stick to fiberglass decks after heat exposure.

Specifically developed for use in recreational applications, Luna Compass HB hybrid performance flooring perfectly complements the interior color palettes and design trends used in today's travel trailers, coaches +and motor homes. Providing cushioned comfort, and easy to clean with built-in Microban® anti-microbial protection, Luna Compass HB is the flooring choice for many of the leading recreational vehicles MFG.

Item# STRAT-40 * .040 Gauge

Strataglass is a scratch resistant, clear plastic sheet that blocks out nearly 100% of UV light. Sheets are 54" x 110" Sold by the drum (5) or individually.

Makrolon® Polycarbonate sheets provide clear glass like clarity with durability and impact resistance. Three sewable products available to suit your enclosure window needs. Solarfix® PTFE thread or size 138 dacron thread and diamond point needles are recommended for sewing.

Makrolon® AR2 is .060 x 48" x 96" recommended for flat installation
Abrasion resistant coating on both sides provides many years of clarity with UV and chemical resistance. Many Shops do use this in curved applications and you may experience micro cracking in the AR coating over time.

Item #
MAK060 *

Makrolon® VR is .040 x 52" x 110" used in both flat and curved installations
VR means "vinyl replacement" use anywhere you might use vinyl curtains.
Easily sewable, crystal clear, impact resistant however not abrasion resistant but with proper care will last for years. VR can be rolled, making it ideal for applications with limited storage.

Item #
MAK-VR40 *

Makrolon® Marine 5 is .060 x 50" x 110" recommended for curved installations
It has a 5 year warranty against breakage yellowing or micro cracking
It also has AR2 that provides abrasion resistance on both sides
Exceptional durability and longevity against the harsh marine environment

Rex Pegg Fabrics, Inc

Parasol™ COMMERCIAL GRADE KNITTED SHADECLOTH

Parasol™ is designed for Australian conditions and made to stringent quality and manufacturing specifications.

Parasol™ is a commercial grade knitted shadecloth suitable for tension structures and other heavy duty applications. It is manufactured using a combination of high density monofilament and tape which offers a higher degree of protection from UV radiation, known to cause sunburn and skin cancers.

For ease of fabrication and improved performance, **Parasol**™ shadecloth has been 'heat set' before rolling, to improve lay flat characteristics and dimensional stability.

- UV stabilized
- Heat set
- Abrasion resistant
- Up to 95% UVR block
- High strength
- 10 year warranty
- Fire retardant

Rex Pegg Fabrics, Inc

One of the best ways to keep Sunbrella® marine fabrics looking good and to delay the need for deep or vigorous cleaning is to hose fabrics off on a monthly basis with clear, cool water. In most environments, a thorough cleaning will be needed every two to three years.

General or Light Cleaning:
Use a sponge or soft brush to apply mild soap and warm water to the fabric. Rinse thoroughly. Air dry

Outdoor Upholstery Cleaning Removable Fabric

Hand Washing

Soak fabric in a solution of 1/4 cup mild soap per gallon of lukewarm water. Use a sponge or very soft bristle brush to lightly agitate the stain. Then rinse thoroughly to remove all soap residue and allow fabric to air dry.

Machine Washing

Some removable casings can be washed in the washing machine. However, consult the furniture manufacturer before removing the casing as cushion construction may vary. To wash, first close all zippers. Machine wash in cold water on the delicate cycle with normal amounts of mild laundry detergent. For severe mold or mildew, add 1 cup of bleach. Allow fabric to air dry.

Cleaning Non-Removable Fabric

Prepare a solution of 1/4 cup mild soap per gallon of lukewarm water. Use a soft bristle brush to clean, allowing the cleaning solution to soak into the fabric. Rinse thoroughly to remove all soap residue and allow fabric to air dry.

For best results when cleaning upholstered pieces, clean the entire surface area of the fabric, from seam to seam, instead of rubbing the fabric in a circular motion on the spill. This method, along with an extractor, may be required in order to avoid water rings and residue.

An upholstery cleaner such as 303® Multi-Surface Cleaner

Oil Based Stains

If a stubborn oil based stain persists after cleaning, use Sunbrella Extract™ Oil Based Stain Remover or treat with a strong degreaser and rinse thoroughly.

Mold and Mildew

Sunbrella fabrics do not promote mildew growth, however, mildew may grow on dirt and other foreign substances if not removed from the fabric. To remove mold or mildew:

Prepare a solution of 1 cup of bleach and 1/4 cup mild soap per gallon of water.
Spray on entire area and allow to soak into the fabric for 15 minutes.
Clean entire surface area with a sponge, clean towel or very soft bristle brush.
Rinse thoroughly to remove all soap residue.
Air dry.
For severe mold/mildew growth, bleach quantities may be increased.

One of the best ways to keep Sunbrella fabrics looking good is to brush off dirt and debris before it becomes embedded in the fabrics and to address messes and clean spills soon after they occur. The quicker you clean spills, the easier they can be to remove.

TOP GUN® 1S is a one sided acrylic coated 100% woven polyester fabric. It is characterized by excellent strength, durability, tear and abrasion resistance, dimensional stability, & UV and mildew resistance. Because TOP GUN® 1S has no pigmentation on the underside, color rub is near impossible. TOP GUN® 1S can be used for many outdoor applications such as marine tops, trailer covers, bimini tops, gazebos, canopies, tarps, playground equipment covers, BBQ grill covers, patio furniture covers and many other useful applications. TOP GUN® 1S, the great middleweight fabric. TOP GUN® 1S is 60” wide, 9.0 ounces per square yard. It is a great fabric for those looking for high performance without a heavy fabric. It is available in many popular colors.

Top Gun 9 is an acrylic coated, 100% woven polyester fabric (450 denier) utilizing a proprietary formula and process to coat the top and bottom, allowing the fabric to be completely reversible. As part of the Top Gun family of premium coated fabrics, it is characterized by excellent strength, durability, tear and abrasion resistance, dimensional stability, UV and mildew resistance. Top Gun 9 is a medium weight fabric that provides long lasting durability without the high cost and weight of heavier fabrics with better performance than similarly priced fabrics. Top Gun 9 can be used for many outdoor applications such as marine tops, trailer covers, bimini tops, gazebos, canopies, tarps, playground equipment covers, BBQ grill covers, Patio furniture covers and many other useful applications.

TOP NOTCH® FR, is a solution dyed polyester flame retardant fabric. Utilizing a proprietary coating on the underside. Top Notch FR will provide unparalleled flame resistance, water resistance, and tear resistance, all while not stretching, shrinking, or sagging. Top Notch FR meets most known flame retardant specifications, both initial and leaching. That means that unlike other fabrics, you dont have to worry about still meeting a flame specification after it has been exposed to the elements. As part of the Top Notch family of premium solution dyed fabrics, it will provide exceptional colorfastness. Top Notch FR is perfect for awnings, tents, gazebos, canopies or any application requiring colorfastness and flame resistance.

TOP NOTCH® is a 100% solution dyed polyester fabric (840 denier) with a fluoro-carbon finish, resulting in a fabric that is breathable, reversible, water repellent and has a luxurious hand. Because the yarn is solution dyed, color fastness is exceptional. TOP NOTCH® is the ultimate fabric that combines strength, abrasion resistance, dimensional stability and UV resistance. TOP NOTCH® can be used for many outdoor applications such as marine tops, trailer covers, awnings, gazebos, canopies and patio furniture. TOP NOTCH® is 60″ wide, 11.5 ounces per square yard, and is dimensionally stable. The solution dyed polyester fabric won't fade and provides superior strength compared to other solution dyed fabrics. Because of this, it is ideal for any application.

SOFTOUCH® is the perfect fabric for those looking for protection while also worried about damaging the painted, gel coated or other delicate surface on the underside. While regular fabrics can scratch these, SOFTOUCH® will not, due to its soft backing. Utilizing our ODYSSEY® fabric that is laminated to a special non-woven backer, SOFTOUCH® provides the ultimate non abrasive surface to cover and protect your possessions. Performance and Luxury, SOFTOUCH®. 60” wide, 11 ounces per square yard, with a non woven underside.

Drip Rail is a flexible plastic, peel-and-stick drip edge rain gutter that eliminates the time-consuming installation process required with aluminum rain gutters. Our peel-and-stick tape attachment method doesn't require any drilling or bolting and eliminates the risk of rust and corrosion. This high-quality rubber drip rail is ideal for a wide variety of vehicles, such as trucks, cars, and vans. Sold in 250 foot rolls

Marine Hardware

Boat Vent II allows for proper cover ventilation while keeping rain and insects out. Vents attaches to 7/8" tubing

Item #
BOAT-VEN2WH *

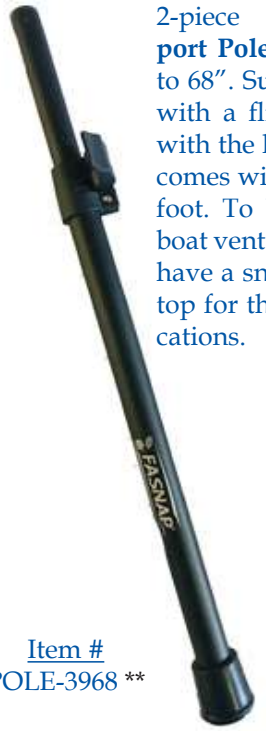
Item #
BOAT-VEN **

Boat Vent 3 allows for proper cover ventilation while keeping rain and insects out. Has 40% more venting than the boat vent II. Vents attaches to 7/8" tubing

Item #
BOAT-VEN3 **

Boat Vent Aero is a sew in vent that installs directly into the cover. Louvered front keeps rodents and bees out. Provides extra protection from heavy rain.

Item #
BOAT-AERO **



2-piece telescoping **Support Pole** adjusts from 39" to 68". Super easy to adjust with a flip of your thumb with the level lock adjuster, comes with a sturdy rubber foot. To be used with our boat vent II or III, also could have a snap installed to the top for those snap in applications.

Item #
POLE-3968 **

This 2-piece telescoping **Support Pole** adjusts from 41 to 72 inches which is used to add a center support for boat covers, canopies, tents, and attach to boat vents, plus so much more. Made from bright anodized aluminum tubing, this support pole is highly resistant to corrosion and wear. Available also are the parts all sold separately to make your own custom pole .

Marine Hardware

Rubber Pole Base makes installing your boat cover quick and easy. With the ability to swivel and hold the pole in place, you no longer have to climb in and out of your boast as you install your cover. The thermoplastic rubber gives the pad a firm grip, its large base protects your flooring from damage caused by standard crutch tips and helps disperse the poles weight. For use with Sup-10 or our 7/8" aluminum tubing.

Item #
BOAT-BASE *

Scribe-All® water soluble white marking pencils are used to make pattern markings directly onto the fabric. It is truely an all-surface pencil you can use it with vinyl, coated fabrics, Sunbrella®, even clear window material. Marks are easliy removed from fabrics and surfaces with just a damp cloth. Sold individually or by the dozen.

Item #
SCRIBE-ALL (White) *
SCRIBE-BLA (Black) *

Stayput fasteners allow for easy installation into materials of varying thickness. Greater contact area means there is a smaller likelihood of Stayput fasteners tearing the fabric. Dome hooks provide a low profile attaching point for up to 1/4" shock cord and easily attach with two screws. 2 3/8" in diameter.

Stainless Steel Fittings

Ball & Socket stainless steel marine fittings allow full rotation of the top frame. This feature makes it quick and easy to fold down the frame and remove the top from the boat. The deck mounts combine delrin inserts and release pins with lanyards to provide smooth movement and rattle free fit. These fittings are sure to enhance the look of your next boat top frame.

Marine Fasteners

LOXX® fasteners are the strongest, most-versatile, self-locking, quick release fastener ever made. They close and lock automatically, will never accidentally open, will never rust, and will withstand shearing force greater than 225lbs! Easy to install in no time at all just punch a hole in the material (if not using ball stud), insert LOXX® fastener and screw on the washer. The washer with teeth grips material and holds extremely tight! LOXX® is reliable in its use, it is manufactured sustainably and surprises time and again with its innovative design. Fasteners are stocked in a nickel or chrome on brass finish.

SNap ADhesively attached SNAD® fasteners are a 1" diameter, conformable, flexible based, adhesive backed standard snap stud for use where screw-in studs won't work. They are not designed for any load bearing vertical applicaion or vertical shear. Their peel and stick application offers unlimited attaching options for placing snap studs on tubing, boat hulls and decks, as well as many other applications. Available in Black, Grey, and White.

Deluxe boat bow frame kit that fits up to an 80" beam. Kit includes: Two 7/8" bright anodized aluminum bows, 4 eye ends, 2 jaw slides, 2 deck mounts, 2 deck loops, 4 1" buckles, 2 snap hooks. Cut to width and height, then assemble

Groz Beckert San 5.2 double grooved needles are recommended to be the best for sewing Makrolon®. Although diamond tip needles are capable of sewing through polycarbonate, they may abrade the weave of the fabric more than tripoints. **A more roundly pointed needle will move between fabric fibers** versus physically cutting the weave which may eventually cause the fabric to fray. Sold in packages of 10 needles or boxes of 100 needles.

Item #
135X17SAN5.2 *

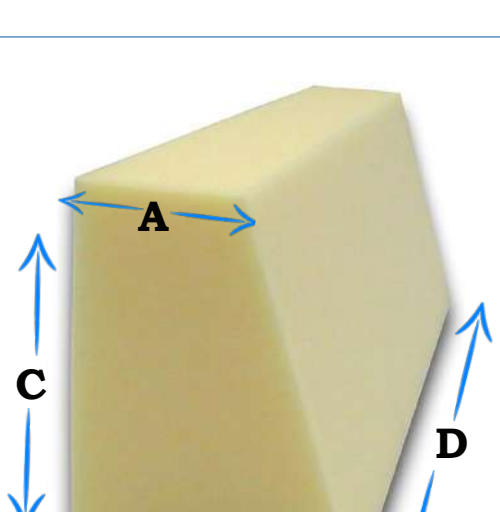
HEAT-GUN *

A - B x C x D



All foam wedges should be ordered in the following way.

Foam Type ?
How many Wedges ?
Single Wedges will be made with a glue seam unless noted otherwise.

How to Calculate Foam

Thickness x Width x Length =(cubic inches)÷144= (board feet) x Price = Cost of each piece of foam

Example:

2" x 27" x 82"= 4,428 ÷ 144 =30.8 x $1.29 =$39.70 Each

Foam production: Please give our foam shop ample time to cut your custom orders. We have a 12:00 pm foam cut off on standard block size sheets to get your order the next day. Custom cuts may take longer.

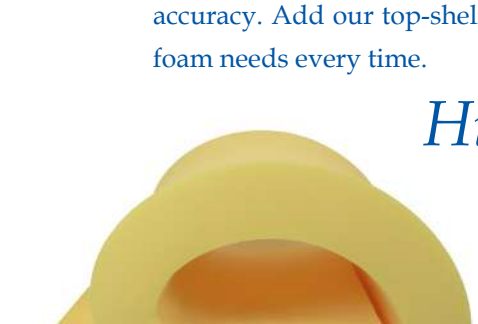
Rex Pegg Fabrics, Inc

Expert Staff

Foam Production

Rex Pegg's knowledgeable staff is trained to ensure that your project runs smoothly from ordering to delivery. Our foam department operates in a 15,000 square foot building that houses some of the most cutting edge equipment operated by our expert staff. We have 7 saws: two slitters, two table saws, one vertical wire-saw, one horizontal wire-saw, and one contouring saw. The centerpiece of our cutting-edge foam equipment is the Fecken-Kirfel C56 horizontal saw capable of full contour cutting with unparalleled accuracy. Add our top-shelf staff to our full array of equipment and it gives us the ability to meet your foam needs every time.

High Resilience vs. Conventional Foam



High Resilience (HR) foam has a cell structure that is much different than conventional foams. This difference in cell structure leads to added support, comfort, and durability. HR foams have a high support factor, which is a measure of overall surface comfort compared to core support. HR foam tends to have a higher density level. HR foam makes a very high quality cushion for furniture and mattresses.

IFD "Indentation Force Deflection"

Indentation Force Deflection is a measure of load bearing capacity or firmness. IFD is measured on the surface as 25% IFD, and under full load bearing conditions as 65% IFD. The higher the 25% IFD, the firmer the surface feel. Foams with higher 65% IFD values resist bottoming-out and provide a firm ride cushioning. Ideal IFD specifications will depend upon the application.

Density

The weight of a cubic foot of foam. Density is independent from firmness. Although foam production conditions can adversely affect the grade of flexible polyurethane, Density is considered to be the most important indicator of overall foam quality. High Density polyurethane is less likely to "bottom out", "fatigue" or "dish". High Density virgin foam cores can be designed to provide plus surface softness without sacrificing deep down support.

Serene® 2512 Bedding

Serene® foam is enhanced with billions of microscopic air capsules which act to enhance the support properties while reducing pressure on critical areas of the body. Serene® self-adjusts to individual body contours, but unlike memory foam, it is not temperature sensititve.

Available Sizes

Queen Mattress	2″ x 60″ x 80″
King Mattress	2″ x 76″ x 80″

Serene® 2524 Seating

Serene® foam has the same pressure relief and cool comfort layer as the soft, yet firmer for all purpose seating. Add 1″ or 2″ sheets to a base of HR foam cushions for a luxurious comfort and therapeutic feel.

Available Sheet Sizes

1″ x 24″ x 86″
2″ x 24″ x 86″

Serene® foam is enhanced with billions of microscopic air capsules which act to enhance the support properties while reducing pressure on critical areas of the body.

CARPENTER

We bring comfort to your life.™

High Resilient Cushioning Foam

Qualux® cushioning foam combines superior comfort and durability under the most stressful conditions. Qualux® has a super-high retention of firmness, keeping its shape and cushioning ability well after most foams breakdown. With over 20 years of experience, Carpenter has used their expertise to design one of the premier high-resiliency foams on the market.

Medium	Best all around seat cushioning foam and also works well for plush marine and RV mattresses.
Medium Firm	Used for a wide variety of residential and commercial seating applications, as well as marine and RV mattresses.
Firm	Excellent for any type of cushion being placed over a solid surface. Works well for boat seating as well as commercial and contract applications.
Extra Firm	Used in applications where foam needs to have a lower profile but still provide support without bottoming out. Works well for church seating as well as automotive seating.
Super Firm	The firmest HR foam available in the Northwest market. Used heavily in commercial and medical applications. Excellent for bar stools, massage benches, exercise equipment, heavy duty equipment seats, motorcycles and snowmobile seats, church kneelers, plus many more.

*Meets requirements set forth in the California Technical Bulletin #117-2013

Understanding California Technical Bulletin 117-2013 Flammability standard requirements for upholstery furniture, updated with addition of SB 1019 requirements please visit our website at www.rexpeggfabrics.com for a downloadable spec sheet.

Qualux® is a registered trademark of Carpenter

For all sheets sizes with a list of each foam type we carry please refer to our separate price list. We will be happy to email a copy to you with pricing.

Rex Pegg Fabrics, Inc

Conventional Cushioning Foam

Ultra Soft	Used as a wrap over cushions to provide a deluxe plush feel.
Soft	Works well for back cushions and soft seat cushions as well as soft commercial applicaions.
Medium Packaging	Utility grade foam that works well in many packaging and other commercial applications.
Medium	Works well for general purpose seating applications and can be used as a softer mattress foam.
Firm	Used in seating applications where a lower profile yet supportive cushion is required. Works well for marine seats and camper cushions.
Extra Firm	Works well in marine and commercial applications where a thinner foam is required without compromising support.

EZ- Dry Reticulated Foam

Cushion Breathe is firm, porous, antimicrobial foam that allows air to circulate under an upholstered marine, RV, or outdoor seating cushion to keep moisture and condensation from accumulating. Sold in ½" Sheets

Item #
CUSH-BRE

Reticulated foam is available to order in a large array of thickness also, sheet widths only. (Please refer to our price list for sheet widths)

Sales Policies

Order Minimums:	One yard minimum cut per item. **Shipments** - $10.00 minimum per invoice (not including freight) **Deliveries** - Due to the high demand of our traveling salesmen and delivery drivers, orders placed for delivery will require higher minimums. We will do our best to accomodate our customer's demands, however, some areas may not be deliverable due to location. Please contact your sales representative for further details.
Credit Department:	Our credit department will welcome sufficient information necessary for the establishment of credit. Standard terms are Net 10th (10 days after end of month) upon credit approval.
Payment Options:	Net 10th with approval, Visa, MasterCard, Discover card, American Express, check with approval, cash or money order.
Returned Checks:	Returned checks are subject to a $25.00 service charge.
Past Due Accounts:	1.5% service charge per month on all invoices that go beyond our normal terms.
Returns:	Returns must be made within 90 days of purchase date. Authorization is needed for all returns and will be subject to a 20% restock charge. Cut yardage sales under 5 yards will not be accepted for return.
PROP65 Warning:	Chemicals known to the state of California to cause cancer and birth defects or other reproductive harm may be present in some of the products in this catalog. By accepting and using the products in this catalog, purchaser agrees to comply with the laws of California, SB1019, and to hold Rex Pegg Fabrics harmless from any violation thereof, including attorney fees.
All Shipments:	Once goods have shipped, Rex Pegg Fabrics is not responsible for any delays or late delivery of merchandise in transit. Aerosol cans and other hazardous materials cannot be shipped by air. Some adhesives and cleaners can only be shipped by truck or common carrier.

UPS Shipping

United Parcel Service (UPS) has the most wide spread and reliable shipping service.

As long as you have your orders in by 3:00 PST we will ship your order out the same day!

***Foam orders need to be placed before 12:00 PST**

Fedex Shipping

Federal Express, Ground and One Rate (2 day service)

As long as you have your orders in by 3:00 PST we will ship your order out the same day!
