Electron Top

Manufacturing Company

One of Our Products is Service

"*WE* believe that business should be more than just a cold transaction".

When you call *Electron*, whether it be technical information or to place an order, you can always expect a pleasant voice on the other end.

The Final Touch

For some time now *Electron* has been transferring its original master patterns to a computer system. Above, the digitized pattern is receiving the final touch up and is nested for the computer cutting table.

Accurate Beyond Belief

WE have the latest in single ply computerized cutting with accuracy that can be within five thousandths of an inch. The new cutting system totally eliminates the wear and inaccuracy that can occur when using paper patterns.

Proper Assembly

Our sewing machine operators are the best. All of our operators have been trained here at *Electron* to fit into our way of doing things right. Most have been with us for more than a decade and are the nucleus of our operation.

Updated Technology

WE use the newest in controlled heat sealing equipment. The machines are better, cleaner, and safer to operate than the older machines.

Careful Transfer of Patterns

Each pattern is carefully transferred, through direct digitizing, from time proven paper patterns. Every one of our patterns is given special attention to its originality and detail, to assure a proven fit and lasting performance that

WE are famous for.

"54 YEARS IN THE MAKING"

Business experts have said that family companies rarely survive past a second generation of ownership. We are elated to say that in June of 2010 we celebrated our 50th Anniversary and are on the third generation of family owners. We tried to capture some of the highlights of our last 54 years of existence on the following pages.

"The Beginning, First Generation and Grandpa Yudt"

Grandpa
c. 1910

Our Grandfather Henry Yudt; at age 12 (Left), as an apprentice carriage builder in Budapest, Hungary. He emigrated to New York City in 1920 and went to work in the custom auto body building industry, that was flourishing at the time.

In 1930 he went into the Auto Trim business as "Richmond Hill Auto Top." His attention to detail, incredible craftsmanship and kind personality made him an upholsterer sought after.

Grandpa in front of his
work bench c.1931.

Grandpa was the first Auto Trim Association Hall of Fame recipient.

M G's in front of Richmond Hill Auto Top.
Grandpa had the building erected in 1948.

Whilst Grandpa was busy with Richmond Hill Auto Top, our Nanny stayed at home taking care of all the important things that a house required to be called a home. She was very supportive of her husband; our grandfather, and did a great job of raising their three children in a very loving environment. She was also an incredible baker.

Grandpa inspecting the progress on an upholstery job (Below).

Grandpa Yudt (L) & his brother Ferdinand (R) (WE called him Vati Onkel, meaning Daddy Uncle in English), custom trimming a new convertible top. They both had a great reputation for quality craftsmanship and a kind demeanor (Above).

Our Mom recalls, when she was younger; about 10, she would ride her bicycle to Grandpa's shop to bring him Nanny's homemade lunch. It was a 4 mile ride and she rode it quite often...
ok, so this isn't Mom at age 10; nor is it the bicycle she was riding, but it's the only picture we had of Mom on a bike (Below).

Richmond Hill Auto Top, 135-11 Hillside Ave. c. 1950.

Grandpa had a new building erected in 1948 capable of handling the expansion of Richmond Hill Auto Top. He had 12 trimmers working for him, two of which were his brother Ferdinand and son-in-law, our Dad, Fred. Later Mom's brother Henry went to work for Grandpa and ran Richmond Hill Auto Top up until his retirement in 2001. Our Dad, Fred (L), Grandpa Yudt (2nd from left), and Grandpa's Brother Ferdinand Yudt (9th from Left).

Grandpa Yudt behind his desk in the showroom of Richmond Hill Auto Top; The Shop on Hillside Avenue, with an early display of Electron Top in their showroom (Right).

Like most family run business', the past generation continued to lend moral support and share their knowledge even after retirement. Grandpa would occasionally stop in and see how things were going (Below).

Grandpa Yudt was a wonderful man whose kind heart was exposed on a regular basis. He was a true gentleman and a person who loved to laugh, tease and sing. He kept a little black book in his drawer that he would write jokes in and keep the grandchildren entertained with the many puns held in its interior. His days as an apprentice in Yugoslavia were long gone, but the conviction he gained for honesty and integrity stayed with him till his passing in 1986.

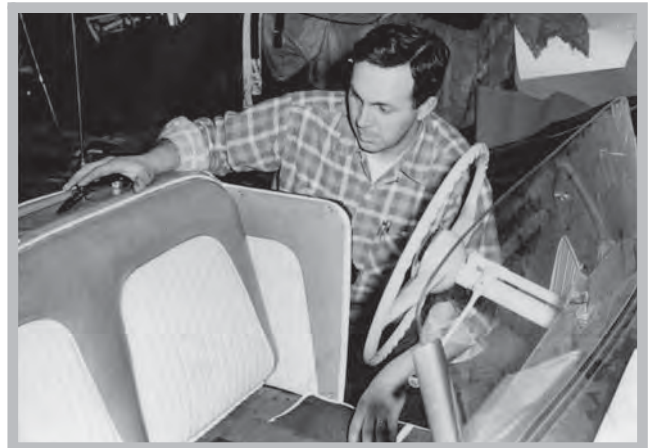

"Second Generation; Our Dad, Fred"

Our Dad was the first president of the Automotive Trimmers Association of New York.

Dads real father died when our eldest sister Linda was very young. Grandpa Yudt treated our Dad like his own son.

Back in the 50's there were "Trimorama" competitions and our Dad won 2nd place with the seats pictured to the right.

Mom (L) and Dad (R) presenting an Auto Trimmers Association Award.

Dad would organize top installation demonstrations and Auto Trim Dinners (Below) in the 1960's. They were held in the shop at Richmond Hill Auto Top. Some of the attendees included such pioneers of our industry like Nat Danas (L), seated along with Nelson Butterfield (Haartz Auto Fabric), our Dad, Fred and Ken Richie (Haartz Auto Fabric).

Dad made a handmade metal ET. This was the backdrop used at some of the Auto Trimmers Association gatherings that took place at Richmond Hill Auto Top in the 1960's (L).

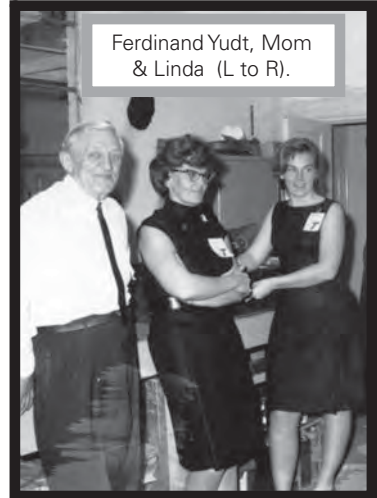

Dad always said, "Find a need and fulfill it." In the 1950's and 60's Dad competed with running field dogs. During that time he developed a very durable chap made out of Naughahyde. He called them Field Chaps and *We* produced and sold them at Electron Top until 1989. In 1999 *We* contemplated making them again but the material had become too costly.

Our sister Linda (1945-2002), was the eldest of the Strauss children (below). She participated in the earlier building of Electron Top and accompanied Mom & Dad at local events. In 1975 she married, bought a funeral home and later an embroidery business in Virginia where she raised her five girls.

In the early years, Dad would attend Trade Shows representing Electron Top and Richmond Hill Auto Top.

Ferdinand Yudt, Mom & Linda (L to R).

Last Convertible Rolls Off Line

With all the hoopla usually accompanying the introduction of a new model, the last American-built convertible has rolled off the assembly line at Detroit.

It ends a 74-year era of American rag tops and of cruising down the avenue with the wind whipping casually through a person's hair.

The \$11,049 white Cadillac Eldorado, driven by Edward C. Kennard, Cadillac general manager, was the 200th "Last of the Convertibles" built by Cadillac. The car is being kept by General Motors for "historical purposes," Kennard said.

Cars Bear Plaques

The other 199 cars—each emblazoned with a plaque saying, "This 1976 Fleetwood Eldorado is one of the last 200 id convertibles produced in a drive Cadillac's 1,600 dealers."

Kennard was accompanied by Mayor Coleman Young of Detroit, and H. B. Brawner, general manufacturing manager of Cadillac. He wheeled the car amid balloons, banners and people dressed in jackets and shirts proclaiming their love for the last soft top.

Several hundred and office workers at the complex cheered as the engine roared to life and

have sold 20,000 cars if it had had enough tops.

His prediction earlier this year that the final soft tops would become collector's items appears to be coming true. Some dealers offered \$2,000 above cost for the vehicles.

Predicts Return

Mayor Young, who said he's owned six or eight convertibles, said he didn't think an era had come to a permanent end.

"With the law of supply and demand," he said, "I think some enterprising auto maker will start making rag tops again."

Woodrow Powe, who installs fender braces on the assembly line for Cadillac, agreed.

"In three or four years," he said, "we'll be building 10,000 more."

After 60 years of automobile existence, the last American made convertible vehicle rolled off the General Motors production line in 1976. It was a very uneasy time for us. We didn't know what the future had in store, but as always "Everything always works out!"

HALL of FAME

Fred Strauss
A Man Who Lit Up The Industry

In 1986 Dad was inducted into the Auto Upholsters Hall of Fame. It was a wonderful honor for him especially when his award was presented to him by his long time friend and "Father of our Auto Trim Industry," Nat Danas. Rick, Dad, Nat and Skip. (L to R Below)

Not until 1948, that Fred began his career in auto trim by going to work for his father-in-law at Richmond Hill Auto Top. Fred continued to work at Richmond Hill for a number of years, before splitting the company to form Electron Top in 1966. A firm believer in this industry, Strauss saw his sons, Rick and Skip, become involved with the business, creating a third generation of master-craftsmen devoted to quality. Fred Strauss is now thinking about retiring, having built a house and barn in upstate New York, and just finishing a log cabin in the Adirondacks. He also enjoys bass fishing at his condo in Florida. Fred finds a great deal of pleasure, these days, in his complete wood working shop; as well, when he's "not running around on his ATV's," and is currently restoring a 1967 Amphicar, which he hopes to have in the water this summer.

Mom & Dads last convertible was a 1976 Cadillac Eldorado.

THE END: The last American-made convertible—a Cadillac Eldorado—rolls off the assembly line at the Cadillac plant of General Motors at Detroit. Riding the car off the line are (left to right) H. B.

Brawner, general manufacturing manager of Cadillac; Mayor Coleman Young, of Detroit, and Edward Kennard, general manager of Cadillac. Cadillac employees watch.

"The Convertible Comeback"

In 1982, Chrysler & Volkswagen brought the Convertible Automobile back. "Things worked out" and we flourished due to the renewed interest in rag tops sparked by the realization of the possible value of restorable convertible vehicles.

Kimmy & Dad 1986

We have always thought of our Dad as being a great contributor to the Auto Trim Industry and a special man. It was a terrific feeling for all our family knowing *We were not being bias.*

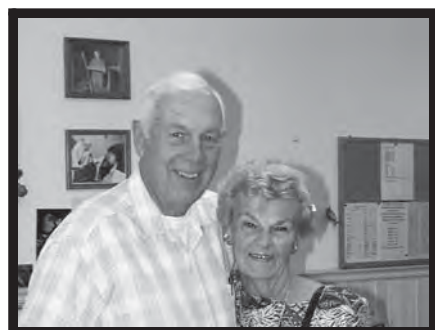

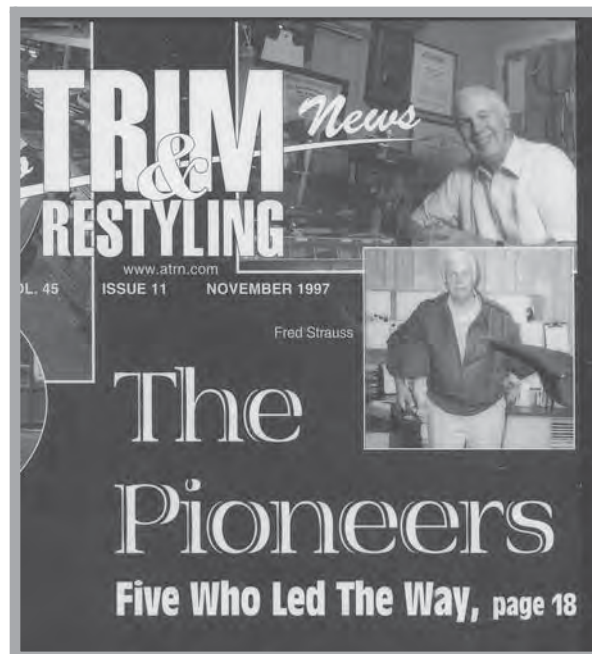

Dad & Nat 1986

Dad always told us, "Never take your hands off the work (your product)" He never did, and continued to guide and teach us, even after his retirement in 1987.

10 years after retirement Dad was honored on the cover of Auto Trim News. He shared the honor with David Eash & Richard Gilbreath of E & G Classics, Gaither Spradling of Spradling Originals and Jerry Roman of Roman Chariot.

Like most successful people, our Dad was accompanied on his journey by our Mom. Mom took on any job that needed to be done with a positive attitude and enthusiasm. Some of her jobs included accounting, making sample cards (which were cut by hand then), going on sales trips, but most of all being supportive of Dads dreams. Mom continues to come into work on Mondays and support us. Our Mom and Dad made a great team. Their logic, foresight and strong relationship created a firm foundation for us to build on. They ran Electron Top very successfully for 27 years before passing it on to Rick & Skip.

We painted our name on the interior wall of our shop. It reminds us to this day that *We* did not arrive to this point without a lot of hard work and dedication not only by ourselves but also by our elders. Dad with his two boys and companions.

Skip (L) & Rick (R)

"Flag Day"

Every year on Flag Day; June 14th, *WE* celebrate the anniversary of the birth of *Electron Top*. In 2001, *WE* changed the name of our celebration to "Founders Day". Dad was with us to enjoy that first year.

Our Dad left behind a script that could be adapted to all our business and personal issues. We are grateful for the person he was and the people he helped us to be, but mostly for the endless love he shared. *We* miss him dearly. (1922-2002)

"Third Generation Rick, Skip & Kimmy"

Dad was a very social man that enjoyed the company of his peers. He enjoyed hosting upholstery installation and Auto Trim Association dinners in order to share his knowledge and create a mutual bond within the industry. He spent many years perpetuating his talent and experience with his employees; always with the idea in mind of maintaining quality and craftsmanship. Two of those employees were his sons Rick & Skip. His boys learned from the bottom up and were taught that being the boss' son did not represent privilege; it meant that they had to work harder than anyone else to prove themselves to other employees. Skip and Rick have done a great job of maintaining Dads ideals and complimenting them with their own.

After almost two decades of working as Dads apprentices Rick (L) & Skip (R) decided to continue, what had become a family tradition. They took over ownership of *Electron Top* in 1987. Dad later remarked, "The best compliment I have ever received was from a customer who had been dealing with Electron Top for many years." He recalled, the customer saying "Fred nothing changed when you left."

Rick (L), Dad (C) & Skip (R) learning the ropes from Dad at an Auto Trim Show.

Since the third generation of ownership, Rick & Skip have been a catalyst for many changes. Electron Top has experienced great growth both in a loyal following of customers and a workforce that averages 17 years of employment. They mesh old world craftsmanship with new age technology by bringing in computerized cutting, hot air sealing, digitizing and also photo-capturing of patterns, and in 1994 the manufacturing of glass rear windows.

Kimmy joins her brothers in 1988, celebrated in an article in Auto Trim News.

"It is sometimes difficult for the older generation of business owners to accept changes made by the younger, but Mom and Dad always displayed great enthusiasm and pride towards the job WE were doing. They made regular trips to *Electron Top* displaying enthusiasm and interest towards every new change." Skip, Mom, Dad & Rick (L to R) in 1994.

"Keeping in Touch!"

1994 Domestic Car Identification Update

January 1994 - The first issue of our monthly newsletter, "Keeping In Touch" is released. The name was changed the following month to "Keep in Touch." The letter was created to "Keep in Touch" with our customers and them with us.

1993-94 Chevrolet "Chevy" front, pickup the GM-2010 "Chevy" 1970s, are found
1993-94 Chrysler "Latter" than the earlier models (1993) has a blacked-out, and available for the first time
1993 Chevrolet "Corvette" into the 1990s
1993 Dodge Dakota Pick-up, there "It is best to remove
1993 Dodge "Shadow" (1993)
1994 Ford "Mustang" (1994) better one. Unlike the earlier model which couldn't get 200
1994 Mercury "Capri" (1994) recently perfected the auto seat belt to be transferred from Capri to
1990-94 Oldsmobile "Cutaway" manufacturing the cutaway features apply. It comes in 1990-94 models "Lexus"

Kimmy, Linda and Dad in 2001 (L to R) "Taking a ride in *Electron Top's* Mascot" c. 2001

"Visiting Customers"

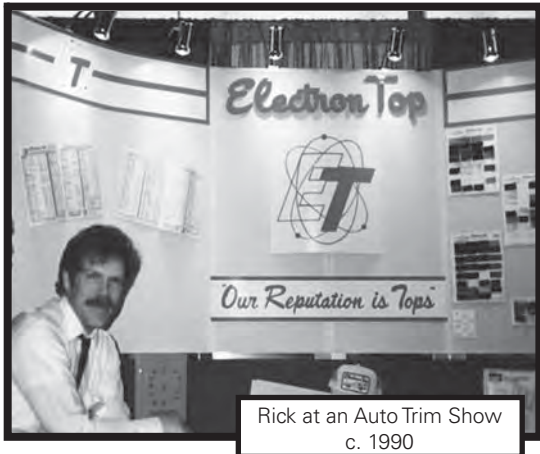

1960's - Dad spent many days throughout the 60's visiting upholstery shops promoting our products. Those visits established relationships that, in many cases, still exist today. Some of you may even remember him flying to your local airport in his Cherokee Piper.

1976 - 1988 - Being very loquacious and a bit of a free spirit, Rick took over sale's visits traveling to our customers on the East Coast in a Realite motor home. He; like Dad, did a great job maintaining relationships with our customers.

1988 - 1990 - After many years of exposure to the convertible top business, Kimmy took over the pleasure of visiting customers on the east coast. Mom and Dad were against overnight trips except when she could spend the night with her sister Linda and 5 nieces in Virginia. No, we never visited customers in an Amphicar!

Skip at a Philadelphia Auto Trim Show

Rick at an Auto Trim Show c. 1990

Rick, Kimmy and sometimes Skip travelled to the different trade shows meeting customers in person, sometimes for the first time. Many times *We* recognized a customer by the sound of their voice before *We* knew who they were.

Childhood Memories

Rick

I remember watching the old German men spitting tacks and hand making all the tops and interior upholstery. Later I remember Dad making patterns out of oak tag for the quarters of tops that would later be the beginning of our basic pattern source today. I recall being in Dad and Grandpas upholstery shop picking up hog rings with a rolling magnet type of thing so they would not puncture the tires of the cars, constructing shipping boxes using an old hand cranked stapler and also sweeping the floors. I also remember the Christmas parties in the shop; Dad always made sure everyone received a ham, a bottle of spirits and the children of all the employees received gifts.

Skip

Working with Dad as a young boy I also remember he had started Rick and I doing odd jobs like sweeping the floors and picking up hog rings. I was infatuated with all the different tools that were used by the trimmers to fabricate new tops, seats and interior items.

I was especially interested in the pneumatic staple gun that Rick and I used to shoot at each other until *We* got reprimanded. I remember Grandpa kept pennies in his drawer that *We* were always privileged to use in his gumball machine. As I got older I was given jobs that were appropriate for my age; like backing cars out of the shop for Grandpa. One car I backed into the opening for the garage door ... oops, I was 12.

Our Dad took great joy and responsibility in the perpetuation of his knowledge, skills and life lessons. I am grateful for the person he was. I will always be intrigued by the abilities he had, his kind mannerism and his ability to communicate to others his vast knowledge in so many fields.

Kimmy

To this day the smell of vinyl convertible top material still reminds me of being a little girl going into work with Dad and him calling me his "little shaver." It was difficult waking up at 5:00 am but it was all worth it when *We* stopped at the Greek diner to pick up the biggest blueberry muffins I had ever had. My first job on those early mornings was to walk over to Richmond Hill Auto Top (for a long time Electron occupied the same building) and give Grandpa and Uncle Hank (Moms brother) a kiss hello. Grandpa would give me quarters to buy candy or a soda from the machines. The soda came in little glass bottles and there was a bottle opener attached to the machine. I remember rolling wire-on for .05 cents a piece, .01 cent per bag to pack end-tips with screws (a good day could bring up to \$15) and playing with all the office machines. I remember Dads rules were strict but loving, and the lessons were endless and sometimes tough: "If you want our employees to respect you, you have to work twice as hard and as well as them"; "Our first product is not convertible tops but people so be respectful" and "Don't ever contradict me." Most of all I remember Dads smile - it was often and it made his eyes twinkle.

WE have been working together since 1988. Working with family can be trying at times but the rewards are in abundance.

"We are not the beginning nor the end."

Strauss Grandkids

Jenna, Caitlyn, Courtney, Lauren,
Lindsey,
Christopher, Chrissi,
Jillian (JillyBean),
Tabitha, Lori, Lisa
(pregnant with Addison)
(L to R).

Electron Top Facts

- ** Dad made the suggestion to Haartz Auto Fabric to extrude vinyl on a preshrunk lining to avoid excessive shrinkage that was a problem with vinyls made in the 50's.
- ** We used to be called Electron Sales.
- ** Our logo used to be red not blue.
- ** Rick, Skip & Kimmy all worked for Electron Top more than once.
- ** We used to make vinyl sheds for snowmobiles.
- ** The name *Electron Top* came from the use of electronic heat-seal equipment and referred to the electrons that made up the radio frequency (R.F.) waves that create the heat used for sealing the vinyl.
- ** The average length of time for an employee to work with Electron Top is 17 years.

"WE", is a story spanning three generations of a family engaged in the Auto Trim Industry that eventually led to the creation of "*Electron Top*". Our Dad, Fred W. Strauss Jr., deplored the use of the word "I" in conducting business. He often reminded us of a book that Charles Lindbergh wrote about his solo accomplishment crossing the Atlantic in 1927 that was named "*WE*", in recognition of the support received from others. Our story cannot match that of Lindbergh's heroic deed in significance, but "*WE*" hope it will keep us ever mindful of the help and support one gets from family and business associates. Sometimes help comes from strange and unexpected places. When you look back on your own accomplishments, you will probably realize too, that you didn't do it alone.

The late Henry Yudt (1897-1989), our Grandfather, was born in Hungary and started his apprenticeship at age 12 in a carriage factory in Budapest. During World War I he did upholstery for aircrafts. In 1920 he came to America and while learning to speak English worked in the custom auto body building shops that flourished in New York City at the time. By 1930 he went into the Auto Trim business as "Richmond Hill Auto Top" in a rented store in Queens, NY. In 1948 a new building was erected directly across the street from the original shop. The original trim shop, in business for over 60 years, was operated since 1965 by his son Henry until closing its doors in Fall 2001. Henry Yudt Sr. was a craftsman and businessman of the highest caliber and he was the first "HALL OF FAME" recipient in the Auto Trim Industry.

SECOND GENERATION

Fred W. Strauss Jr., of a later generation than Mr. Yudt, was trained as an aircraft mechanic, and went to work for Grumman Aircraft Co. in 1940. He worked until 1942, when he enlisted in the Navy flight program to fulfill a life long ambition to become a Naval Aviator. After being commissioned as a Naval Aviator in 1945, he married Henry Yudt's daughter, Catherine, our Mother. Upon returning to civilian life in late 1947, he returned to Grumman until mid 1948 when he went to work for his father-in-law in the Auto Trim Industry. Henry Yudt Sr. and Fred Strauss Jr. earned a fine reputation as operators of one of the most successful custom trim shops in the New York area and in 1955 Fred W Strauss Jr. (Our Dad) became the first President of the Auto Trim Association of New York.

In 1958-59 a few years after the introduction of vinyl coated top materials, the electronic fused (heat sealed) seams appeared on factory tops. This created a problem for a complete custom trim shop, like Richmond Hill Auto Top. It meant that "*WE*" would have to buy our tops from the larger less quality oriented manufacturers, or invest in heat seal equipment and learn how to use it. During the same period of time in the late 50's, the mixture of old and new ideas grew gradually from making convertible tops by cutting, fitting, and stitching each and every top individually, to a unique semi-modern pattern and production method. "*WE*" chose to buy heat seal equipment and were probably the only custom trim shop to heat seal their own tops. Almost before the equipment was in place, (knowing the reputation of Henry Yudt Sr. and Fred Strauss Jr. for quality and craftsmanship) "*WE*" were approached by several jobbers who were interested in selling tops made by "Richmond Hill Auto Top".

THE BIRTH OF *Electron Top*

In 1960, out of one of the oldest trim shops in the northeast "*Electron Top*", was born. "*WE*" chose Marbeth Fabrics to do selling for us and enjoyed several years of steady growth. In the early 1960's, Marbeth Fabrics reorganized. Marty Karzmar lost his partner Jack Rosenthal and "*Electron Top*" was left without a selling organization, so our Dad did the selling. In 1965 Dad bought Cherokee (180) an airplane, a visiting custom-some of you and flew around his visits, since I'm sure most of you are still valued the next few customers. For some good key years he left the in the hands of men. However,

in the normal evolution of things one key man left *Electron* and became a very successful marine canvas man. A year or so later our foreman was offered a job as a service manager in a family owned Toyota dealership near his home (an offer he couldn't refuse). So our Dad rolled up his sleeves and went back to the hands on production and pattern making with special attention given to Mercedes and other Imports.

He vowed never to stop working with his hands again and never did. Dad always said :

"The harder he worked the luckier he got!"

"*WE*" all have fond memories of working for Dad as young children on days off and during summer vacations from school. Some of our jobs involved rolling wire-on for 5 cents each, packaging end tips with screws for a penny a piece, hand cutting swatches, and pasting sample cards for 25 cents each. "*WE*" also engaged in sweeping the floor and picking up hog rings in the trim shop, which "*WE*" did not get paid for. Most fathers would like to have their sons and daughters join them in a family business. Our father was no exception. Dad was receptive, but the boys and Kimmy wanted no part of the regimentation that a training program under Dad's scrutiny would bring. They had enough of that through their school days.

Craig (Skip) was not overly enthusiastic about academics in school, but he excelled in mechanics and electronics. He was thrilled by any opportunity to take apart, put together, or modify anything that had an engine or battery. He built a dune buggy, rebuilt a bulldozer for Dad, and learned how to fly airplanes, both full scale and radio controlled. After some interesting jobs, mostly connected to the automotive industry, Skip took some electronics and computer programming courses. Skip realized that computers could satisfy his desire to work with his hands without getting them dirty. His thirst for knowledge, never ending ambition, and love for new technology brought the new age to *Electron*. Skip is responsible for all the computer programming, our computerized cutting machines and the composition of our advertising, catalog and top patterns. Dad told Skip during one of his projects "Read the book!", he never stopped, and continues to amaze us with his vast knowledge and capabilities.

Fred III (Rick) a few years older than Skip; spent some years in the Army where he became a medic attached to a helicopter outfit. After an honorable discharge he pursued some college, became a manager of an ambulance company and rescue team; an EMT, certified parachute rigger, skydiver, and a certified scuba diver. All these great accomplishments couldn't support his life style so he decided that he would give Dad another chance. Rick, besides being loquacious, is a very ingenious sewing machine operator and is responsible for many fixtures and special procedures.

Our Dad Passed Away February 2002

" We miss him terribly! "

Kimberly (Kimmy) I'm much younger than my brothers, but in 1988 I joined them at *Electron* after working several years at JFK International Airport as an Import Manager. One of my jobs at *Electron* was to put this story together. It was enjoyable, but not nearly as much fun as greeting customers on the phone and managing the office. Each month I spend quite a bit of time putting the newsletter together which we try to mail monthly.

Dad was inducted into our industry's "**HALL OF FAME**" in 1986 and retired at the end of 1987. He spent most of his spare time flying Radio Controlled Model Airplanes with a bunch of very active Seniors. Dad and Mom spent most of their later years driving together between their different houses enjoying the company of wonderful friends in each location.

"*WE*" were always delighted when Dad visited with us at the shop and joined in the discussions. "*WE*" derived a great deal of support from him as he shared his 53 years of experience in the Auto Trim Trade. Dad gave us the Motto, "**Our Reputation is Tops!**". He said that he saw it on a truck that did kitchen counters. It makes no difference because it has become our incentive and responsibility.

Mom has recently joined us in the office. Its exciting to have her here. She was always at Dads side during the birth and raising of *Electron* and ballast for us kids at home while Dad was busy with the company. She has seen *Electron Top* grow from the beginning.

"*WE*" are proud of our Dad and Grandfather; who gave us a strong foundation upon which to build, with strong principles and skills to use as tools.

"*WE* are not the beginning, nor the end."

Dad with the  Girls.

Electron Tops WARRANTY

Convertible tops - made out of American vinyl materials carry a 72 month warranty when installed on power operated frames and 48 months on manually operated frames. Tops with built in glass or vinyl back windows made in Vinyl, Stayfast, Topline or Sonnenland materials, carry a 48 month warranty on both power and manually operated frames. This does not include the plastic or vinyl window.

Economy tops - Ch4945, Fo4260, Fo4310 and Mz8340 made out of Haartz vinyl material, Stayfast or Topline carry a 36 month warranty. This does not include the plastic or vinyl window.

Glass window assemblies - carry a 60 month warranty against delamination of the bond between the glass and the material.

All warranties - stated herein are not transferable and only apply to the original purchaser's vehicle on which the product was installed. Installation of an *Electron Top* product constitutes acceptance of its warranty.

Electron Top's warranty covers the following:

- * Delamination or failure of heat sealed deck seams
- * Excessive shrinkage over 4%.
- * Delamination of the bond between the glass and the material for 60 months to the original purchaser.
- * Bad or cut stitching, or any other visible damage before installation has started.
- * Flows, mars or pits in vinyl materials before installation has started.
- * Zippers, fasteners, hardware or plastic parts before installation has started.
- * Gross weave problems in canvas longer than 3/8" (small ones are acceptable by OEM).
- * Major glass distortions before installation has started.

Electron Top is unable to warranty any product due to or for the following conditions:

- * Acts of God or vandalism.
- * Bad frame design, misaligned or malfunctioning frames.
- * Wear, pinch holes, fading or shrinkage of material under 4%.
- * Visible flaws, tears, blemishes, cut stitches or other noticeable faults after the start of installation.
- * Altering *Electron Top* product in any manner without our written consent including window tinting.
- * Accident, misuse, negligence or bad installation.
- * Use for other than private usage (commercial or rental).
- * Broken or cracked glass, bad defroster lines and/or tabs after the start of installation.
- * Vinyl windows cracking, scratching or uv degrading after the start of its installation.
- * Zippers, fasteners, hardware or plastic parts after the start of installation.
- * Installation by other than a professional upholstery shop.
- * The use of any citrus, petroleum or abrasive cleaners not recommended by the manufacturers of the material.
- * Products not manufactured by *Electron Top*.
- * Shade differences due to unavoidable pattern directional layouts.
- * Installation of any non O.E.M. accessory or conversion.
- * *Electron Top* "Classic Top" label has been removed.
- * *Electron Top* is not responsible for the way in which our products are installed by the installer.

The use of *Electron Top* products constitutes the buyer's understanding that: *Electron Top* cannot be held responsible for any collateral liabilities arising out of the use of its products. Furthermore, there are no additional warranties expressed or implied beyond what is described in our catalog's published warranty.

Should a Top or Glass Assembly Prove Defective - within the first 12 months, the product will be replaced. After the first year we will prorate the item. We reserve the right to request photographs of the installation prior to removal. Complete failure of the glass bond constitutes a warranty and replacement of the glass assembly without being prorated. Replacement of a product does not extend the original warranty of the item being replaced. *Electron Top* will be held harmless for any loss of time, revenue or consequential damages from the use of its products. Our registration number must be present on the label.

Labor - Installation of an *Electron Top* product constitutes registration of the warranty. In the unlikely event a claim is made, we will require proof of purchase (a photocopy of the original invoice). If a top or glass assembly has proven to be defective within the first year, we will issue a standard labor credit (you can call to confirm the offered labor). There will not be any labor credit issued after 12 months.

Labor credits are at *Electron Top's* sole discretion and are issued as a direct credit to the installer of the replacement in the form of another *Electron Top* product (another top, glass assembly, etc.). *WE* reserve the right to repair or replace a product with another like or reconditioned product at our discretion.

RETURN POLICY

Please call before returning any item. Items that have not been installed must be returned in the original packaging, folded in the original manner and taking extreme care of the vinyl windows, if any. *WE* take special care in the packaging of our products when we ship them, please return them in the same way. *WE* cannot accept any returns over 60 days from date of sale, except by special arrangement. Returns damaged by improper repacking will not be credited and will be returned to the customer. All applicable returns will be inspected before credit is issued and may be subject to a 15% restocking charge. *WE* will be unable to credit any item damaged, due to poor repacking. Cut Yardage of Material and Special Orders are not returnable.

Universal Glass

** Caution, Glass Must Be Unzipped Prior to Folding **

We manufacture a universal glass which can be used with our GM3070 & GM3660 top. The glass may need alterations to align the bottom of the assembly to the tacking strip. Depending on the application, the material surrounding the glass may show from the outside of the vehicle. We used a black top over a white glass to illustrate this. Please advise your customer, this glass does not carry a warranty or guarantee.

"Family owned third generation."

1942-47	All Models CLASSIC TOP St01 or St04 Double Blank Window is Material Matched Standard Front & Rear Pad Set 75" (See Pad Pages) This top has all of the original details. The tops major seams are top stitched, there is a reinforced flap running down inside of each quarter to accept snaps, and no side reinforcement stitch. The rear window opening runs straight up with a separate bound valance that forms the upper window opening. The rear curtain is double blanked with two zippers if you have the plate that screws to the rear bow. If you do not have the rear bow plate please let us know we will make you a double blank curtain with 3 zippers. Either way the rear curtain is set up to accept a small glass and frame (supplied by your customer). All bound edges are hand rolled and top stitched. The price includes, top, rear double blank curtain, and 4 piece pads.	\$ 1480.00 included included	GM 0473	20 ?	8

	IMPERIAL				
1957-57	Crown Vinyl Curtain Brass Zipper (Wrap Around Color Matched) Standard Universal Front Pad Set 66" Black Lining 1957 & 1958 Crown Imperial while very similar in appearance, they have different size tops. The late 1957 production uses a 1958 top. The rear curtain on the 1958 top fastens to the outside of the body and is covered with a belt molding as most Chrysler products do. The 1957 curtain fastens down inside the body and is clamped between the outside and inside belt molding. The 1958 top will overhang the door windows by about 1 1/2" on each side when installed on an early 1957 model.	\$ 525.00 \$ 245.00 \$ 70.00	CH 2190	28 1/2"	8 2

<h2>CLASSIC LINCOLN CONTINENTAL</h2> <h3>1941-48 Continental</h3>				
1941-48	Classic Lincoln Continental (Hardware Kit Included) Made in these Materials Only St01, St04, St11 or St14 Hardware Kit Contains the following: Strap, Buckles, Footman Loops, Hooks, and Aluminum Plates. Glass and Frame (8" x 23") (Sold Separately) Chrome Outside, Tan Inside	\$ 1640.00 Included Call	FO 3163	

NOTE: Our 1941-48 Classic Continental Top is designed detail for detail from an original top. We make it using Haartz Stayfast or Topline; in Blk on Blk, Tan on Tan, or Blk on Tan only. The center deck is one piece from the rear deck to the binding across the front bow. An aluminum plate, supplied with the hardware kit, is screwed to the rear bow between the double material above the rear curtain opening to hold the center deck in position without visible tacks or wireon trim. On the rear bow the original rear curtain is hung on two webbing straps; also supplied with our hardware kit. In addition, we supply the original style rear curtain with our **CLASSIC TOP** and bind the top with top material to duplicate the original.

We also make a production Continental Top that uses a one piece horseshoe zipper on the rear curtain. Sealed vinyl tops are not usually recommended for this type of installation, unless you split the top at the rear bow and install wireon trim over the tack line.

"Tension Strap Warning"

A problem has been occurring with the 1987-1999 BMW "i" Series convertible tops. The issue is that the frame pinches and/or tears the top near the bows and sometimes the side quarters. The tension straps should be replaced when installing a new top.

* Labor times are based on when the cars were new *

JAGUAR CONVERTIBLE TOPS

Our "Classic XK Roadster" (JA1683) convertible top is carefully crafted with the authentic details of the original design. These distinguishing details are hand-folded edges, finished with piping, Brewster-cross seams, and a double blank window with three zippers (for use with a glass and frame).

The "Classic Top" (JA1673) has no rear zippers and is blank (for use with a glass and frame). This is truly a Classic Top! It's a must for Jaguar owners that intend to show their cars. The Classic top is available in Haartz Stayfast or Topline material only.

We realize that many Jaguars are used every day and do not need all the costly original details of the Classic Top. Therefore, we offer a Service Line, a moderately priced top in other materials and colors as well as Stayfast.

The JA1680 has a horseshoe zipper around the back either for a clear vinyl or a blank insert (for use with a glass and frame). **The JA1670** has no zipper and is blank in the rear (for use with a glass and frame). Both tops are machine bound.

DROP HEAD COUPE The original details (not as unique) are preserved on all Drop Head Coupes, XKE and "E" Type Roadster Tops, when Stayfast material is ordered.

Warranty: WE cannot warranty our vinyl rear windows on 1990-on Mercedes convertible tops. This information has been based on service bulletins provided by Mercedes number 77/26A and 77/39. These bulletins describe abrasions, cuts, tears, holes, pinching and other damages due to the topping and seams in the front section of the top and the rear window assembly. In addition; other damages include; fraying, creasing and breaking of the vinyl rear window caused by the top frame and body assembly of this vehicle. It is never our intent to avoid responsibility, but WE cannot be held accountable for poor design by an original equipment manufacturer.

How to Measure a Bow Height

For Cars that install inside the body opening; measure from the center of the rear bow down to the chrome molding around the body opening.

For Cars that install outside the body opening; measure from the center of the rear bow down to the deck of the trunk.

Electron Top has distributors all around the U.S.A. and in some foreign countries. WE want to make sure our product is always available to you!!

The image features a map of the United States with various states highlighted in different colors (blue, yellow, orange, purple, green). Numerous 'ET' logos are placed across the map, indicating distributor locations. Several callout boxes provide contact information for specific distributors. A large callout box in the center-right contains the company name and slogan. A vertical list on the right side of the map provides details for several specialty distributors.

BMW Tension Straps

BM 8090

We manufacture our own tension straps for all the 1987-93 BMW 3 series convertible tops. They are 1.5" x 67 1/4" long, made of strong tubular webbing with a heavy quality elastic interior and two expansion webbing bands similar to the original.

BM 8110

We manufacture our own tension straps for all the 1994-99 BMW 3 series convertible tops. They are 2" x 67 1/2" long made of webbing with heavy quality elastic including an expansion band and three smaller loops consisting of elastic and grommets.

**** WARNING **** Always change the tension straps when replacing a convertible top on these model BMW cars. Please see our "Tension Strap Warning Below".

Warning: Tension straps aid in the folding operation on both power and manual model BMW convertibles. Straps have spring loaded plastic bands located on the top of the straps towards the front and sometimes the rear of the vehicle. These bands are flat until the top drops back during the folding operation and the tension on the strap is relaxed. The spring loaded bands will then bow upward pushing the top away from the frame.

“That’s why WE at *Electron Top* only use first quality fabric for all of our domestic and foreign topping needs.”

Materials

- CN (Concord)** is a 32 to 36 oz. single textured material with a heavy cotton lining available in Crush (Chrysler Grain) and Levant (Porsche Grain). The material differs from O.E.C. in grain only (Limited Stock).
- IB (Bison)** is a 32 to 36 oz. single textured material made to look like British Everflex. It is produced by The HAARTZ Corp. on a black cotton lining (Limited Stock).
- GR (Sonnenland)** is a 3 ply polyester and acrylic face fabric material made by The HAARTZ Corp - RSI in Germany, and has a cotton dobby lining. It is original on Mercedes, some BMW, Porsche and Saab motor cars. It is available in many colors on a black or tan cotton lining.
- HT (Honda Twill)** is a 38 oz. single textured twill grain material with a poly/cotton lining available in black and white. The HT01 black has a drill backing and the HT02 white has a poly/cotton sheeting.
- HR (Hot Rod/Stayfast)** is a 3 ply, acrylic face fabric, solution dyed and combined to an elastomer membrane on 100% cotton lining. The face fabric is FADE RESISTANT and is available on a black lining with the exception of the Oyster which is only available on a tan lining.
- OE (O.E.C.)** {Original Equipment Color} is a 36 oz. single textured material with a cotton lining, available in a large selection of colors. Some colors might be 32 oz.
- PE (Pigskin)** is a 38 oz. single textured material with a grain similar to the original Wolfsburg grain. Black and White come with a poly/cotton lining, all others have a 100% cotton lining.
- SA (Sailcloth)** is a 34 oz. single textured material with a charcoal colored poly/cotton lining. It is O.E.M. for Chrysler models 1990-up.
- SE (Sailcloth/Eurotopping)** is a 36oz. single textured material with a black poly/cotton synthetic lining and is available 60” wide. It is stronger than single texture and is replacing Tufflex on Ford models 1997-up.
- ST (Stayfast ®)** is a 3 ply, acrylic face fabric, solution dyed and combined to a rubber elastomer membrane on a 100% cotton lining. The face fabric is FADE RESISTANT and is available on a black or tan lining.
- TL (Topline)** is an acrylic face fabric, solution dyed and combined to a rubber elastomer membrane on a 100% cotton lining. The face fabric is FADE RESISTANT and is available on a black or tan lining.
- TG (Topline/G)** is a Twill weave, acrylic face fabric, solution dyed and is combined to a rubber elastomer membrane on a dobby lining like the Sonnenland. It is made by Top-Line Automotive LLC. The face fabric is FADE RESISTANT and is available on a black or tan lining.
- TR (Trojan)** is a 36 oz. single textured material with a heavy cotton sateen lining.
- TS (Pinpoint/Eurotopping)** is a 36 oz. single textured material with a black poly/cotton synthetic lining and is available 60” wide. It is stronger than Trojan and is replacing Tufflex on GM Cars.
- SG (TwillFast/G ®)** is a 3 ply, 100% acrylic face fabric with a Twill weave and has a dobby lining like the Sonnenland. The face fabric is FADE RESISTANT and is available on a black or tan poly/cotton lining. It is O.E.M. on some Audi, BMW, Corvette, Porsche, Saab, Volvo and VW motor cars.
- ST (TwillFast ®)** is a 3 ply, acrylic face fabric, solution dyed with a Twill Weave and combined to an elastomer membrane on a 100% cotton lining. The face fabric is FADE RESISTANT and is available on a charcoal colored poly/cotton lining. It is O.E.M. on Chrysler models.
